	DISTRICT COURT
NORTHERN DISTR	ICT OF CALIFORNIA
SAN FRANCI	ISCO DIVISION
IN RE GOOGLE PLAY STORE ANTITRUST LITIGATION	Case No. 3:21-md-02981-JD
THIS DOCUMENT RELATES TO:	JOINT PRETRIAL STATEMENT
Epic Games, Inc. v. Google LLC et al.,	Judge: Honorable James Donato
	Date: October 19, 2023
In re Google Play Consumer Antitrust Litigation, Case No. 3:20-cv-05761-JD	Time: 1:30 p.m. Courtroom: 17
State of Utah et al. v. Google LLC et al., Case No. 3:21-cv-05227-JD	
Match Group, LLC, et al., v. Google LLC, et	
al., Case No. 5:22-cv-02/40-JD	
	- 2 - IAL STATEMENT
	IN RE GOOGLE PLAY STORE ANTITRUST LITIGATION THIS DOCUMENT RELATES TO: Epic Games, Inc. v. Google LLC et al., Case No. 3:20-cv-05671-JD In re Google Play Consumer Antitrust Litigation, Case No. 3:20-cv-05761-JD State of Utah et al. v. Google LLC et al., Case No. 3:21-cv-05227-JD Match Group, LLC, et al., v. Google LLC, et al., Case No. 3:22-cv-02746-JD

In accordance with Paragraph 3 of this Court's Standing Order for Civil Jury Trials, the 1 Parties hereby submit this Joint Pretrial Statement. Pending before the Court are: 2 3 Google's Motion for Partial Summary Judgment (ECF 483¹) Match Plaintiffs' Motion for Partial Summary Judgment (ECF 486) 4 Also pending before the Court is Google's Motion to Exclude Merits Opinions of Dr. Marc 5 Rysman (ECF 484), but that motion should be held in abeyance and would be mooted by a final settlement among States, Consumers, and Google. Similarly, the issue raised in Google's summary 8 judgment motion relating to whether the Consumers and States have antitrust standing should be held in abeyance and would be mooted by a final settlement among States, Consumers, and 10 Google. Resolution of these motions may affect the nature and scope of the issues to be tried. The Parties do not intend to waive any rights or arguments by submitting this Joint Pretrial Statement.² 11 I. SUBSTANCE OF THE ACTIONS 12 This multidistrict litigation involves claims brought by (i) 39 U.S. States, Commonwealths, 13 and Districts (by and through their respective Attorneys General), (ii) individual consumers, 15 (iii) Epic Games, Inc., and (iv) four dating app developers (Match Group, LLC, Humor Rainbow, Inc., PlentyofFish Media ULC, and People Media, Inc. (collectively, the "Match Plaintiffs")). Plaintiffs bring their claims against Google under the Sherman Act (15 U.S.C. § 1 et seq.), California's Cartwright Act, and California's Unfair Competition Law and multiple other U.S. 18 states' laws. All Plaintiffs seek injunctive relief, and Plaintiffs, other than Epic, seek damages 19 20 and/or equitable relief. The States also seek civil penalties under their state laws as well. Google asserts counterclaims against Epic and the Match Plaintiffs under California state 21 law and seeks declaratory relief, damages, and restitution. Google's position in this submission 22 assumes that the claims of both Epic and the Match Plaintiffs will be tried together. If that were to 23 24 ¹ Unless otherwise noted, docket citations refer to *In re: Google Play Store Antitrust Litigation*, 25 Case No. 21-md-02981-JD. 26 ² The Parties reserve all rights, including to modify positions in this Joint Pretrial Statement and remove any Parties or claims and defenses, as necessary, including after any of the pending 27 motions are decided or, for example, if the settlement in principle between the State Plaintiffs, 28 Consumers, and Google is finalized.

change, then it is Google's position that the Court and the parties may need to revisit the question 1 of which claims and defenses will be tried to a jury. 3 A. The Parties The Plaintiffs are: 4 5 The States, Commonwealths, and Districts of Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Idaho, Indiana, 6 Iowa, Kentucky, Louisiana, Maryland, Massachusetts, Minnesota, Mississippi, 8 Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, 9 New York, North Carolina, North Dakota, Oklahoma, Oregon, Rhode Island, South 10 Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, and West 11 Virginia, by and through their respective Attorneys General (collectively, the 12 "States"); 13 Matt Atkinson, Alex Iwamoto, Mary Carr, Daniel Egerter, Zach Palmer, and Serina Moglia (collectively the "Individual Consumers," or "Consumers"); 14 15 Epic Games, Inc. ("Epic"); and The Match Plaintiffs. 16 The Defendants are: 17 18 Google LLC; Google Ireland Limited; Google Commerce Limited; Google Asia Pacific Pte. Limited; and Google Payment Corp. (collectively, "Google" or 19 "Defendants"). 20 The Counter-plaintiffs are: 21 22 Google LLC; Google Ireland Limited; Google Commerce Limited; and Google Asia 23 Pacific Pte. Limited (collectively, "Google" or Counter-Plaintiffs"). The Counter-defendants are: 24 25 Epic; and 26 The Match Plaintiffs. 27 28

Plaintiffs claim that Google has used a web of agreements and technological restrictions to unreasonably restrain trade in, and unlawfully monopolize, the markets for (i) distributing Android apps (the "Android App Distribution Market"), and (ii) in-app billing services on Android devices (the "Android In-App Billing Market").

Google convinced billions of people and businesses around the world to use the Android mobile operating system ("Android" or "Android OS") on what were ultimately false promises of an open ecosystem that would promote fair and open competition for app services, including app distribution services and in-app transaction services. Instead, Google deployed anticompetitive tactics across all corners of the Android ecosystem, including entering into a series of anticompetitive agreements with mobile network operators ("carriers"), original equipment manufacturers ("OEMs") and app developers, and deceiving consumers about Android's openness and alternative ways of obtaining and paying for apps and in-app content. These anticompetitive tactics also include, among others: (i) entering into revenue share agreements with competitors and/or potential competitors that had opened, or aspired to open, competing Android app stores; (ii) entering into agreements not to compete with competitors and/or potential competitors that opened, or aspired to open, competing Android app stores; (iii) entering into exclusionary agreements with OEMs and carriers to preinstall Google Play on the home screen of their Android devices, and/or not to preinstall competing Android app stores; (iv) imposing technological restraints that prevent developers from directly and effectively distributing their apps and app stores to Android users and unfairly dissuade consumers from downloading Android apps from non-Play sources; (v) imposing unduly restrictive technological restraints that diminish the functionality of competing Android app stores; (vi) coercing potential competitors, such as Facebook, through a pattern of economic threats and bribes to abandon or delay efforts to distribute third-party applications directly, or to otherwise compete with Google's app distribution services; (vii) imposing anti-steering provisions that prohibit developers from communicating with users inside their apps about a user's ability to make purchases outside the app; and (viii) leveraging its power to impose exclusionary terms, including parity and most-favored-nation obligations, on

Android app developers, thereby ensuring no other Android app distribution platform gains the traction, scale, or differentiation necessary to fairly compete with Google Play.

Google also restrains trade in, and unlawfully acquired and maintains a monopoly over, the Android In-App Payment Solutions Market. Google forces app developers and consumers to use Google's separate product, Google Play Billing, to facilitate sales of in-app transactions of digital goods and services sold through apps distributed on Google Play. Using this tie, Google charges supra-competitive prices for in-app transactions of digital goods and services—a revenue share of up to 30%—and restrains innovation by potential competitors.

Google's unfair tactics to restrain trade and unlawfully acquire and maintain its monopolies have resulted in substantial and ongoing harms to consumers, Android app developers and Google's actual and potential competitors in the relevant markets. Google has no legitimate procompetitive justification for its unlawful conduct. To the extent Google has any procompetitive justifications, they are outweighed by the anticompetitive harms that Google's conduct inflicts. Injunctive relief, damages, and civil penalties are needed to remedy these ongoing harms.

- Plaintiffs' Sherman Act and Cartwright Act Claims
 Plaintiffs assert several Sherman Act and Cartwright Act claims against Google:
- Unreasonable Restraints of Trade in the Android In-App Billing Market Under § 1 of the Sherman Act and the Cartwright Act. See ECF³ 188, States' First Am. Compl. ("States' FAC") (Counts 6, 8); ECF 172, Consumers' Second Am. Class Compl. ("Consumers' SACC") (Counts 5, 9); ECF 378, Epic Games' Second Am. Compl. ("Epic Games' SAC") (Counts 7, 11); ECF 380, Match Plaintiffs' First Am. Compl. ("Match Plaintiffs' FAC") (Counts 4, 12).
 - The jury will determine liability and the amount of monetary damages, if any, for these claims. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.

³ State of Utah et al. v. Google LLC et al., 21-cv-05227-JD.

- Unlawful Restraints of Trade (*Per Se* and Rule of Reason) in the Android App

 Distribution Market Under § 1 of the Sherman Act and the Cartwright Act. *See* States'

 FAC (Counts 2, 3, 8); Consumers' SACC (Counts 2, 3, 7, 8); Epic Games' SAC

 (Counts 2, 3, 4, 5, 9, 10); Match Plaintiffs' FAC (Counts 3, 6, 7, 11).
 - The jury will determine liability and the amount of monetary damages, if any, for these claims. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.
- Unlawful Tying of Google Play to Google Play Billing Under § 1 of the Sherman Act and the Cartwright Act. *See* States' FAC (Counts 4, 8); Consumers' SACC (Counts 6, 10); Epic Games' SAC (Counts 8, 12); Match Plaintiffs' FAC (Counts 1, 10).
 - The jury will determine liability and the amount of monetary damages, if any, for these claims. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.
- Unlawful Exclusive Dealing in the Android In-App Billing Market Under the Sherman Act § 1 and the Cartwright Act. See States' FAC (Counts 7, 8); Consumers' SACC (Counts 4, 5).
 - The jury will determine liability and the amount of monetary damages, if any, for these claims. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.
- Unlawful Monopolization/Monopoly Maintenance in the Android App Distribution
 Market and in the Android In-App Billing Market Under the Sherman Act § 2. See
 States' FAC (Counts 1, 5); Consumers' SACC (Counts 1, 4); Epic Games' SAC
 (Counts 1, 6); Match Plaintiffs' FAC (Counts 2, 8).
 - The jury will determine liability and the amount of monetary damages, if any, for these claims. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.
- Attempted Monopolization of the Android In-App Billing Market Under the Sherman
 Act § 2. See Match Plaintiffs' FAC (Count 9).

1	o The jury will determine liability and the amount of monetary damages, if
2	any, for these claims. The Court will determine the appropriate injunctive
3	relief, along with any award of fees, expenses, and costs of suit.
4	2. Plaintiffs' California UCL Claims
5	Plaintiffs bring claims under California's Unfair Competition Law (Cal. Bus. Prof. Code
6	Section 17200, the "UCL"), which prohibits a broader range of conduct than the Sherman Act and
7	Cartwright Act. See Epic Games, Inc. v. Apple, Inc., 67 F.4th 946, 1000 (9th Cir. 2023) (reiterating
8	UCL's "wide standard" that is "intentionally framed in broad, sweeping language").
9	Google's abovementioned course of conduct is unfair, unlawful, and deceptive in violation of the
10	UCL. See States' FAC (Count 8); Consumers' SACC (Count 11); Epic Games' SAC (Count 13);
11	Match Plaintiffs' FAC (Count 13).
12	Liability and any monetary or injunctive relief under California's Unfair Competition
13	Law will be determined solely by the Court.
14	3. The States' Non-California State Law Claims
15	The States allege violations of the antitrust, consumer protection, and unfair trade practice
16	laws of various States, Commonwealths, and Districts. ⁴
17	• The jury will determine liability and the amount of monetary damages, if any, for these

4. Match Plaintiffs' State Law Claims

The Match Plaintiffs assert two further claims against Google under California law for (1) Tortious Interference with Contract and (2) Tortious Interference with Prospective Economic Advantage. See Match Plaintiffs' FAC (Counts 14, 15).

The Match Plaintiffs contend that the jury will determine liability for these claims. The jury will make any assessment of whether the relevant conduct involved oppression, fraud or malice. The Court will determine the appropriate injunctive relief, along with any award of fees, expenses, and costs of suit.

C. Google's Statement Regarding the Substance of Plaintiffs' Claims and Google's **Defenses**

Plaintiffs will not be able to sustain their claims at trial. Android is one of the most popular operating systems in the world, with billions of users and tens of thousands of app developers. Android's success in the marketplace is no accident. Google has invested billions of dollars in Android to create an ecosystem based on openness and choice that competes with the iPhone. Google also offers Android OEMs a free license to a suite of Google software, including products such as Search, Google Maps, Gmail, and YouTube, as well as a series of Application Programming Interfaces ("APIs") that provide services to app developers. OEMs that choose this free license get the ability to build devices that give consumers key services they expect from a smartphone right out of the box on par with the iPhone. Contrary to Plaintiffs' claims, no OEM is required to accept this license to use Android, nor are OEMs who chose to do so prohibited from installing apps that compete with Google's apps, including the Play store. Android's model fuels innovation by giving OEMs the freedom to customize their phones and preinstall the apps they choose, so customers get more choices on phones, features, and apps.

Google also built the Play store, a trusted place for consumers to obtain apps and in-app content and for developers to make apps and in-app content available to consumers. In Google's view, Android could not have succeeded and successfully competed with iOS without a high-quality app store (indeed, Google introduced the Play store's predecessor, Android Market, before Apple opened its app store to third-party applications). Apps greatly enhance the utility of a smartphone—facilitating access to a wide array of functionality beyond making and receiving calls and text messages. OEMs, app developers, and users alike all benefit from the significant investments that Google has made into the Android platform and the Play store.

The Play store provides enormous value to developers and users. For developers, the Play store offers a platform to reach billions of Android users around the world with their apps, as well as services to help developers improve the Android versions of their apps and market their apps.

For users, the Play store provides a safe, secure, reliable method to acquire apps that allow the user to customize their Android device. Google does not charge users to access the Play store, and most developers—97 percent—do not pay Google service fees to use the Play store. Developers do not pay Google any money in service fees unless they make money from (1) paid app downloads from the Play store or (2) selling subscriptions or digital goods in apps downloaded from the Play store. Google's method of collecting a fee for the benefits that the Play store provides—by charging a percentage on paid downloads and in-app purchases—is a standard practice in the industry. And the Play store's service fee–typically either 15% or 30% depending on the developer and the transaction—is at or below the fees charged by competitors like the Apple App Store and console and PC app stores.

Moreover, unlike Apple's iOS, Android offers users and developers choices when it comes to acquiring apps and making in-app purchases. Unlike iOS, Android allows for competing app stores, and today every Android phone manufactured by Samsung—the largest OEM by U.S. sales—comes with a competing app store, the Samsung Galaxy Store, pre-installed on the home screen. Unlike iOS, Android allows users to acquire apps directly from websites. Unlike iOS, Android allows developers to reach agreements with OEMs to pre-install their apps on Android phones. And developers can sell subscriptions or digital goods on other platforms or on their websites, and

those subscriptions or digital goods can then be used in a version of their app downloaded from the 1 Play store. Epic, Match, and many other developers take advantage of these available alternatives. 2 In all these scenarios, Google collects no service fee. Plaintiffs' claims challenge fundamental features of Android and the Play store—design 4 5 choices, investments, and platform rules that Google has implemented to make its products competitive and secure. All of Plaintiffs' claims will fail. 7 Plaintiffs will not be able to demonstrate valid antitrust product markets in which Google has market power because, at a minimum, Google faces intense competition from Apple's iOS 8 platform and from other channels through which developers and users make digital transactions. 10 Nor will Plaintiffs be able to show an illegal tie: no developer is required to use Google Play's billing system to access the valuable services offered by the Play store. For the small subset 11 of developers who chose to monetize their apps through digital in-app transactions, the fact that 12 Google requires the use of Google Play's billing system to efficiently collect the fees for 13 developers' use of Google's intellectual property and services is not an illegal tie. 15 Plaintiffs also will not be able to show that Google's agreements with OEMs, carriers, and developers; its design of the Android operating system; and the security controls it has developed to protect users are anticompetitive. To the contrary, Google will demonstrate that its actions are 17 procompetitive and reasonable and have provided significant benefits to consumers that could not 18 be achieved with Plaintiffs' proffered alternatives without increased costs. 19 20 Finally, Match Plaintiffs' state law tortious interference claims will fail because Match is not entitled to use its contracts with users to remake its contractual agreement to pay Google for the 21 use of Google's intellectual property and services. 18 22 23 D. Google's Statement Regarding the Substance of Its Counterclaims App developers have many choices for how to distribute apps and sell digital content. 24 Developers can choose among platforms like Android and iOS, and game developers like Epic can also choose among PC and console platforms. Developers who choose Android can distribute their 26

¹⁸ As noted, Google agrees that a jury trial is appropriate assuming the claims of all remaining parties are tried together..

apps without using the Play store, through another app store like the Samsung Galaxy Store or through pre-installation agreements or directly through a website. Developers who choose the Play store can make their app available on Play without selling digital content through the app, such as by selling the subscriptions or other content from a webpage, which can then be accessed by the user in the app.

Developers who choose to charge users to download their apps from the Play store and developers who choose to sell digital content through apps distributed on the Play store pay a service fee on those transactions. This service fee reflects Google's compensation for the valuable services that the Play store provides, and this method of collecting a service fee is standard in the industry. This service fee requirement is set forth in the Payment Policy provision of the Play Developer Distribution Agreement ("DDA"). The Payment Policy in the DDA requires developers to process payments for sales of apps and in-app purchases of digital content using Google Play Billing so that Google can collect a service fee on those transactions.

Epic Games and the Match Plaintiffs willfully violated the Payment Policy, reaping the benefits of the Play store without paying the agreed-upon fees. In doing so, Epic and the Match Plaintiffs breached their contractual obligations to Google under the DDA. By using Google's services without paying for their value, Epic and the Match Plaintiffs have also been unjustly enriched. Worst of all, both Epic and the Match Plaintiffs deceived Google into investing resources to help them get more value from the Play store and comply with their obligations when they had no intention of honoring their agreements.

1. Counterclaims Against Epic Games

In April 2020, Epic submitted a version of its *Fortnite* app to the Play store and agreed to abide by the terms of the DDA, including the Payment Policy. Google employees worked around the clock to make the *Fortnite* app available to Google Play's billions of users. What Google did not know was that Epic hatched a scheme it called "Project Liberty"—a secret plan to purposefully breach Epic's developer agreement and thwart Google's ability to collect a fee for the value of the Play store. To execute on this plan, Epic buried code in its version of the *Fortnite* app that would enable Epic to sell digital content without paying Google the service fees it had agreed to pay. Epic

designed the code to make use of what is known as a "hotfix"—a method of updating the app that allowed Epic to activate secret code that would route payments for digital content through its own payment system rather than through Google Play Billing, in direct and flagrant violation of the Payment Policy. Epic used the same "hotfix" scheme for its *Fortnite* app in the Apple App Store.

On August 13, 2020, Epic breached the DDA by activating the "hotfix" and enabling its own external payment system that bypassed Google Play Billing. Epic did not pay service fees on any of the transactions that it routed to its own systems using the "hotfix." At trial, Google will show that Epic violated the DDA terms knowingly and in bad faith when it concealed and then activated the hotfix that bypassed Google's billing system for apps Epic chose to distribute through Google Play. Google will show that it suffered injury in the form of lost service fees that Epic owes Google under the DDA. And Google will show that Epic's breaches of its contractual obligations threaten Google's reputation and goodwill with its users, including by exposing those users to security risks. Google will also show that Epic took service fees to which Google was entitled under the DDA, and unjustly benefitted from other services—including extensive engineering support—that Google gave Epic to facilitate the launch of *Fortnite* on Play.

Google seeks a permanent injunction enjoining Epic, and all persons and entities in active concert or participation with Epic, from facilitating, assisting, or participating in the continued operation of Epic's unauthorized external payment mechanism in its apps, including *Fortnite*; the introduction of any further unauthorized external payment mechanisms into any apps, including *Fortnite*, on the Play store; and the removal of Epic's payment system as an available payment mechanism for in-app purchases through any Play store apps, including *Fortnite*. Google also seeks a declaratory judgment that the DDA is a valid, lawful, and enforceable contract; that Epic breached that agreement; and that Google has the contractual right under the DDA to remove *Fortnite* from the Play store and terminate Epic as a registered Google Developer due to its breach.

2. Counterclaims Against Match Group

The Match Plaintiffs have profited immensely from Google Play. Play has given the Match Plaintiffs a safe, secure platform to reach billions of Android users, and through that platform tens of millions of users have downloaded Match Plaintiffs apps. The Match Plaintiffs' apps have also

benefited tremendously from Google's service fee model. Because Google does not charge either developer or user a fee to download apps, the Match Plaintiffs have been able to offer their apps to users for free, building the large user base that is essential to the success of dating apps.

The Match Plaintiffs built their businesses knowing the deal. But many of them refused to use Google Play Billing and refused to pay Google services fees as required by the agreements they signed. Match Plaintiffs have earned hundreds of millions of dollars by using Google Play, but seeks to further enrich itself by contending it should pay nothing at all to Google.

The Match Plaintiffs try to justify this refusal to honor their agreements and pay for what they use by suggesting that they want to use their own billing systems to give consumers better services. That is not true. The Match Plaintiffs do not want to use Google Play Billing because (1) they do not want to pay what they agreed and (2) they do not want consumers to be able to easily stop paying for Match Plaintiffs' products they no longer want. The Match Plaintiffs make it difficult for consumers to cancel subscriptions. Google Play provides consumers with tools that make it easier to cancel. The Match Plaintiffs do not want consumers to have those tools because it will hurt the Match Plaintiffs' bottom line.

For years, the Match Plaintiffs ignored Google's warnings that they were violating Google's Payment Policy, but Google continued to work with the Match Plaintiffs as valued customers to help them become compliant. In September 2020, Google clarified its Payment Policy, eliminating any pretext for the Match Plaintiffs' refusal to comply, and unambiguously communicating that the Match Plaintiffs would not be able to continue using the Play store's services without paying for them. To avoid that result, the Match Plaintiffs misled Google for nearly two years, intentionally and in bad faith, regarding their intention to ultimately comply with Google's policies. Match Plaintiffs, through their then-CEO and others, repeatedly told Google that they were working on implementing Google Play's billing service on its apps. In reliance on those promises, Google extended the time for Match Plaintiffs to come into compliance, and Google invested substantial resources to add features to Google Play Billing that would benefit Match Plaintiffs.

Despite these representations, Match Plaintiffs never intended to comply with the Payments

Policy. Behind the scenes, Match Plaintiffs were planning to launch a campaign to encourage users to switch to alternative payment methods and to then challenge Google's policies in court.

Based on Match Plaintiffs' conduct, Google brings the following claims: (1) a breach of contract claim based on Match Plaintiffs' breach of the DDA's Payments Policy; (2) a claim for breach of the implied covenant of good faith and fair dealing based on Match Plaintiffs' intentional and bad-faith misrepresentations that it would make necessary modifications to comply with the Payments Policy; (3) a claim for false promise based on Match Plaintiffs' intentional misrepresentations that it would comply with the Payment's Policy, which induced Google to grant extensions and invest its own substantial resources in helping Match Plaintiffs comply; and (4) a quasi-contract/unjust enrichment claim because Match Plaintiffs have been unjustly enriched at Google's expense by inducing Google to modify its billing system and provide distribution and other services to Match Plaintiffs at Match Plaintiffs' request under the understanding that these services were in furtherance of Match Plaintiffs bringing their apps into compliance with the Payments Policy. Google also seeks a declaratory judgment that (a) the DDA is a valid, lawful, and enforceable contract; (b) Match Plaintiffs breached that agreement; and (c) Google has the contractual right under the DDA to remove Match Plaintiffs' apps from Google Play and terminate Match Plaintiffs as registered Google Developers due to their breach.

E. Epic's Statement Regarding the Substance of Google's Counterclaims and Epic's Counterclaim Defenses

Google's counterclaims against Epic must fail because Google's Payments Policy and other contractual provisions that form the basis of its claims are unlawful, as part of Google's unlawful monopolization of the Android app distribution and in-app payment solutions markets. The illegality of these terms renders them unenforceable. "The authorities from the earliest time to the present unanimously hold that no court will lend its assistance in any way towards carrying out the terms of an illegal contract." *McMullen v. Hoffman*, 174 U.S. 639, 654 (1899). That defeats Google's request for a declaratory judgment and its claims against Epic for breach of contract, for breach of the implied covenant and for unjust enrichment. Google's effort to cast itself as the

28

wronged party is both legally and equitably baseless because the restrictions that it chastises Epic for breaching are a key part of how Google forecloses rivals and extracts supracompetitive profits.

F. Match Plaintiffs' Statement Regarding the Substance of Google's Counterclaims and Match's Counterclaim Defenses

Google's counterclaims against the Match Plaintiffs fail for numerous reasons. First, Google's Payments Policy forms the basis of each claim. But as the Match Plaintiffs will demonstrate at trial, Google's Payments Policy is illegal, including because it violates the antitrust laws. See, e.g., Kaiser Steel Corp. v. Mullins, 455 U.S. 72, 77–82 (1982) ("[I]llegal promises will not be enforced in cases controlled by federal law;" court would not enforce contract that violated Sherman Act); see also Lafortune v. Ebie, 26 Cal. App. 3d 72, 74–75 (1972) ("A breach of state or federal antitrust law may provide a valid defense in an action for breach of contract."); Energex Lighting Indus., Inc. v. N. Am. Philips Lighting Corp., 765 F. Supp. 93, 107 (S.D.N.Y. 1991) ("This agreement is in violation of the Sherman Act and this court will not enforce it."). Each of Google's counterclaims fails for this reason alone.

Second, even if Google's Payments Policy were lawful, its counterclaims fail for other reasons. For years, the Match Plaintiffs' dating apps have offered in-app purchases through their own billing systems, alongside or instead of Google's system, Google Play Billing, or "GPB." The Match Plaintiffs did so, historically, with Google's knowing acceptance and in compliance with Google's DDA, which contained a provision allowing for use of non-GPB billing systems for apps whose content could be consumed outside the app. In reliance on that provision, and Google's claims that Android is an "open" ecosystem, the Match Plaintiffs invested substantial resources developing Android apps and establishing direct customer relationships with millions of Android users. Contrary to Google's false allegations, the Match Plaintiffs' billing systems provide better experiences for customers, facilitate better customer services, offer more flexibility in payment options, and enhance user safety. Google wants the Match Plaintiffs to use Google's billing system so Google can collect monopoly rents and harvest consumer transaction data.

In September 2020, Google unilaterally changed its rules, removing the "outside the app" provision and requiring certain apps (including the apps owned/operated by Match Plaintiffs) to

exclusively use GPB. After making this change, Google set a compliance deadline for the unilateral change to the contract for September 30, 2021.

Google then extended the Match Plaintiffs' compliance deadline to this unilateral change to the contract until March 31, 2022. Google granted this extension to the Match Plaintiffs after they filed a standard form and expressly noted that "Google's system is *not a suitable substitute* and exclusive use of Google's systems *will meaningfully harm our users* (inflate prices) & *undermine our business*." This was consistent with the original contract and with the Match Plaintiffs' long-standing position and communications to Google that they did not want to exclusively use GPB. Google granted a similar extension to hundreds of other app developers as well.

Google's counterclaims thus mischaracterize the Match Plaintiffs' extension submissions as a false promise that they would comply with Google's unilateral change to Payments Policy within a particular timeframe. But there was no promise. And, in any event, Google did not justifiably rely on any purported "promise" when granting the extension, as Match Plaintiffs' executives and employees directly communicated to Google that Match Plaintiffs would *not* comply. This is made clear by the fact that Google internally did not believe that the Match Plaintiffs would exclusively use GPB, which is consistent with what the Match Plaintiffs had been doing and telling Google for years.

In short, Google's Payments Policy is unlawful, so each of Google's counterclaims fail. But even if Google's Payments Policy were valid and enforceable, the evidence at trial will show that (i) the Match Plaintiffs had no obligation to use GPB before March 31, 2022, so Google's breach of contract and unjust enrichment claims fail for any prior period and (ii) Google's false promise claim fails because Match Plaintiffs consistently told Google they objected to being forced to comply with this unilateral change to the contract and exclusively use GPB and *never* promised to exclusively integrate GPB (let alone made a promise that Google justifiably relied on).

II. RELIEF REQUESTED

A. <u>Plaintiffs' Common Requested Relief</u>

• A judgment for Plaintiffs and against Google on all claims.

1	•	An injunction prohibiting Google's anti-competitive and unfair conduct and mandating
2		that Google take all necessary steps to cease such conduct and to restore competition in
3		the Android App Distribution Market and the Android In-App Billing Market.
4	•	A declaration that the contractual restraints complained of are unlawful and
5		unenforceable.
6	•	Any other injunctive relief that the Court deems appropriate, after a hearing, to restore
7		competition to the marketplace and any other equitable or injunctive relief necessary to
8		prevent and remedy Google's anti-competitive conduct.
9	•	Any further relief that the Court may deem just and fair.
10	В.	States' Requested Additional Relief
11	•	Compensatory, consequential, and punitive, including treble, damages for injuries
12		directly and proximately caused by Google, as described herein, according to proof.
13	•	An award of prejudgment interest.
14	•	An award of attorney's fees and costs.
15	•	An award of disgorgement, restitution, and civil penalties under state antitrust,
16		consumer protection, and unfair trade practice laws.
17	C.	Consumers' Requested Additional Relief
18	•	Compensatory, consequential, and punitive, including treble, damages for injuries
19		directly and proximately caused by Google.
20	•	An award of prejudgment interest.
21	•	An award of reasonable attorney's fees and full costs.
22	•	Any restitutionary relief available to Consumers as a result of Google's violation of the
23		UCL.
24	D.	Epic's Requested Additional Relief
25	•	A judgment for Epic and against Google on all counterclaims.
26	Е.	Match Plaintiffs' Requested Additional Relief
27	•	Compensatory, consequential, and punitive, including treble, damages for injuries
28		directly and proximately caused by Google, as described herein, according to proof.

1	•	An award of prejudgment interest.
2	•	An award of reasonable attorney's fees and full costs.
3	•	Any restitutionary relief available to Match Plaintiffs as a result of Google's violation of
4		the UCL.
5	•	A judgment for Match Plaintiffs and against Google on all counterclaims.
6	F.	Google's Requested Relief Against Epic
7	•	Compensatory damages for injuries directly and proximately caused by Epic.
8	•	Restitution and disgorgement of all ill-gotten gains obtained by Epic.
9	•	An award of prejudgment interest.
10	•	An award of reasonable attorney's fees and full costs.
11	•	Injunction permanently enjoining Epic, and all persons and entities in active concert or
12		participation with Epic, from facilitating, assisting, or participating in (a) the continued
13		operation of Epic's unauthorized external payment mechanism in its apps, including
14		Fortnite; (b) the introduction of any further unauthorized external payment mechanisms
15		into any apps, including Fortnite, on Google Play; and (c) the removal of Epic payment
16		system as an available payment mechanism for in-app purchases through any Google
17		Play apps, including Fortnite.
18	•	Declaratory judgment that (a) the DDA is a valid, lawful, and enforceable contract, (b)
19		Epic breached that agreement, and (c) Google has the contractual right under the DDA
20		to remove Fortnite from Google Play and terminate Epic as a registered Google
21		Developer due to its breach.
22	•	A judgment for Google against Epic on all counterclaims.
23	G.	Google's Requested Relief Against Match Plaintiffs
24	•	Compensatory damages for injuries directly and proximately caused by the Match
25		Plaintiffs.
26	•	Restitution and disgorgement of all ill-gotten gains obtained by the Match Plaintiffs.
27	•	An award of prejudgment interest.
28	•	An award of reasonable attorney's fees and full costs.

7	Direct Pay, a	nd Unreal Engine, a powerful software suite available to third-party developers that
8	allows them	to create digital content and apps.
9	В.	Stipulated Facts Regarding the Parties' Claims
10	1.	Google LLC is a wholly-owned subsidiary of Alphabet Inc.
11	2.	Google Ireland Limited, Google Commerce Limited, Google Asia Pacific Pte. Ltd.,
12	and Google F	Payment Corp are subsidiaries of Google LLC.
13	3.	Google offers various products and services, including Android OS, Chrome, Gmail,
14	Drive, Maps,	Play, Search, YouTube, Google Cloud, and Search Ads 360.
15	4.	Google acquired the Android mobile operating system in 2005.
16	5.	A mobile operating system ("OS") provides multi-purpose computing functionality
17	to a mobile d	evice such as a smartphone or a tablet.
18	6.	To be useful to consumers, a mobile OS must be able to run software applications or
19	"apps."	
20	7.	A mobile OS facilitates the use of apps through code, such as application
21	programming	g interfaces ("APIs"), which app developers use to create apps that are compatible with
22	the OS.	
23	8.	An "app" is software separate from the mobile OS that runs on a mobile device and
24	adds specific functionalities to a mobile device.	
25	9.	Consumers use apps to perform a variety of tasks on their mobile devices.
26	10.	Entities that manufacture mobile devices—such as Samsung or Motorola—are
27	referred to as	original equipment manufacturers ("OEMs").
28	11.	OEMs pre-install an OS on the mobile devices that they manufacture and sell.
		- 26 -

1	12.	Instead of developing their own OS, almost all OEMs today license a third party's
2	OS for their devices.	
3	13.	Apple does not license iOS to other OEMs.
4	14.	The Google Play store is an app store owned by Google that distributes apps on
5	devices runnii	ng the Android OS.
6	15.	To distribute an app on the Google Play store, app developers must first enter into
7	Google's Dev	reloper Distribution Agreement ("DDA").
8	16.	The predecessor to the Play store was called Android Market.
9	17.	Google launched Android Market in October 2008.
10	18.	Google's Android Market app store was rebranded as the Google Play store in
11	March 2012.	
12	19.	Google launched its in-app billing service in 2011.
13	20.	On August 13, 2020, Epic Games, Inc. ("Epic") filed Epic Games, Inc. v. Google
14	LLC et al., Ca	se No. 3:20-cv-05671-JD.
15	21.	On July 7, 2021, the States, Commonwealths, and Districts of Alaska, Arizona,
16	Arkansas, Cal	ifornia, Colorado, Connecticut, Delaware, District of Columbia, Florida, Idaho,
17	Indiana, Iowa	, Kentucky, Maryland, Massachusetts, Minnesota, Mississippi, Missouri, Montana,
18	Nebraska, Ne	vada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North
19	Dakota, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, Virginia,	
20	Washington, and West Virginia, by and through their respective Attorneys General (collectively,	
21	the "States"),	filed State of Utah, et al. v. Google LLC, et al., Case No. 3:21-cv-05227-JD.19
22	22.	On May 9, 2022, the Match Plaintiffs filed Match Group, LLC et al. v. Google LLC
23	et al., Case No	o. 3:22-cv-02746-JD.
24	23.	Timothy Sweeney is Epic's controlling shareholder, CEO, and board chairman.
25		
26

28	stipulate to the	ttlement agreement is reached with the States and Consumers, Google does not is fact being introduced to the jury.
		₋ 27 ₋

24. In April 2020, Epic made the decision to make Fortnite available for download 1 through the Play store. 2 3 25. Epic and the Match Plaintiffs signed Google's DDA. 26. Match.com launched on the web in 1995. 4 5 27. The Match.com app was released on the Play store in 2010. 28. The Tinder app was released on the Play store in 2013. 6 7 **DISPUTED FACTUAL ISSUES** IV. 8 The Parties incorporate the disputed fact issues raised in their respective briefs filed in connection with the pending motions for partial summary judgment. ECF 486 (Match Plaintiffs' 10 Motion for Partial Summary Judgment); 483 (Google's Motion for Partial Summary Judgment). 11 As it relates to the disputed questions of fact regarding the relevant markets at issue underlying the Plaintiffs' State and Federal Antitrust Claims (Section IV.A below), Google 12 contends that, per Court order, Plaintiffs are limited to the presentation of two relevant product 13 markets. Sept. 8, 2023 Minute Entry, ECF 603 at 2 ("the experts will present testimony on no more 14 15 than two relevant markets"); Sept. 7 Hr'g Tx. at 39:15-16 ("But two markets, fine. I don't want two and a half markets or two markets plus this other thing. Okay?"). Despite this clear directive from the Court, Plaintiffs intend to present to the jury a third relevant antitrust market—for 17 18 licensable operating systems—on the basis that Google should have filed a motion in limine to 19 prevent them from doing so, despite the Court's order limiting them to two markets. Google 20 contends that no such motion in limine was required in light of the Court's order. Indeed, that order was correct. Plaintiffs concede that they are not alleging anticompetitive effects in this third 21 market; they only allege harm in two downstream markets. Defining a third market in which 22 Plaintiffs do not allege any harm to competition will merely confuse the jury about which markets 23 are actually relevant to the elements of Plaintiffs' antitrust claims. The Court's order was therefore sound. If the Plaintiffs would like to seek relief from the Court's order, Google will be prepared to address the merits of that application, including at the pretrial conference. 26 27 Plaintiffs disagree. Google has been aware for over three years, since Epic filed its complaint on August 13, 2020, that Plaintiffs allege the existence of three relevant markets. And

just over a year ago, on October 3, 2022, Plaintiffs served their expert economist reports that defined those markets: one that includes Google's Android OS, one that includes Google's Play store, and one that includes Google Play Billing. Google prepared its responsive expert reports and deposed Plaintiffs' experts on these opinions. Google did not bring a *Daubert* motion or move *in limine* to exclude them. Even now, Google does not identify any legal rule that would prohibit Plaintiffs from explaining to the jury the markets that Plaintiffs believe are relevant to assessing Google's conduct—because there is no such rule.

Instead, Google has opportunistically seized on an instruction the Court gave in the context of addressing its concern about "experts on the same side having irreconcilable or conflicting views of what the market is." (Sept. 7 Hr'g Tx. at 39:23-25.) There is no such conflict here. As discussed at the September 7, 2023 conference, Plaintiffs' economic experts will testify regarding the anticompetitive effects that Google's conduct has caused in two markets: Android app distribution and Android in-app payment solutions. As part of that testimony, the experts will explain that Google's power over OEMs through its control of the Android operating system enables Google's anticompetitive conduct in the two harmed markets. That is important evidence for the jury to hear in order to understand a key source of Google's power and to see how Google has been able to perpetuate its monopoly. In fact, it is responsive to Google's arguments that directly implicate conduct outside the two harmed markets. Google's Trial Brief argues that its anticompetitive conduct at issue is necessary so that Google's Android operating system can compete with the Apple iOS operating system. Dkt. 639 at 1:8-9 ("The conduct challenged by Epic and Match—agreements with phone manufacturers and developers, security policies, and a service fee model—is how Android competes with Apple's iOS and other platforms."). Google cannot make operating systems a focal point of its case while simultaneously prohibiting evidence on the power Google exploits through its Android operating system. While Google may wish to keep that evidence from the jury, the Court should reject Google's last-ditch attempt to try to arbitrarily restrict the scope of Plaintiffs' long-disclosed expert testimony.

proceedings that may be necessary regarding such relief. Google submits that the timing and format of any such proceedings should be decided after the jury trial concludes. (See ECF 505 at 12-13.)

VIII. SETTLEMENT

The States, Consumers, and Google have reached an agreement in principle to settle this case and are in the process of finalizing a long-form settlement agreement to submit to the Court for approval. (Dkt. No. 596 at 1)

IX. ESTIMATE OF TRIAL LENGTH

A. Trial Length

The Court directed the parties to discuss a reduction of trial hours in the event of a final settlement between Google and the States and Consumers. ECF 603 at 2.

Consistent with the Parties' prior proposal (Dkt. No 505 at 4), Plaintiffs continue to recommend a trial limit of 100 hours. For reference, in Epic v. Apple, the Court allocated 90 hour

Consistent with the Parties' prior proposal (Dkt. No 505 at 4), Plaintiffs continue to recommend a trial limit of 100 hours. For reference, in *Epic v. Apple*, the Court allocated 90 hours for a single-plaintiff bench trial in which no damages were sought and there were no counterclaim defenses to be tried other than the defense of illegality, which overlapped with the plaintiff's main claims. Further, the court admitted eight hours of deposition testimony and written direct testimony from the experts with no reduction in the Parties' allocated 90 hours. Here, even if States and Consumers settle, there will still be the additional time associated with a jury trial and there will still be two plaintiffs, damages claims brought by both Match and Google, and unique counterclaim defenses.

Google contends that if Epic and the Match Plaintiffs remain as the only plaintiffs, then there should be a trial limit of 90 hours. The 100-hour limit was predicated on the State Plaintiffs and the Consumer Plaintiffs making opening and closing statements and putting on their own evidence. There are fact and expert witnesses that will not need to be presented if the State Plaintiffs and the Consumer Plaintiffs are no longer participating in the trial. A reduction in hours

is therefore appropriate. The Parties agree that this time should include all components of each side's presentation, including opening and closing statements, witness examinations, and the presentation of deposition or written discovery designations to the jury. If there is no final settlement between Google and the States and Consumers, then the Parties continue to recommend a trial limit of 100 hours, consistent with their prior proposal (Dkt. No 505 at 4). В. **Allocation of Trial Time** The Parties agree that trial time will be evenly divided between the Plaintiffs as a group and Google. Trial time shall be kept pursuant to the procedures set forth in Paragraph 34 of the Court's Standing Order for Civil Jury Trials.
